

## State of New Jersey

Richard J. Codey  
*Acting Governor*

Department of Environmental Protection

Bradley M. Campbell  
*Commissioner*

On July 18, 2000 the New Jersey Educational Facilities Construction and Financing Act (the "Act") was signed into law. A focus of the Act is school renovation and construction projects that are currently underway in New Jersey's 31 special needs school districts, known as the Abbott school districts. Under the Act the New Jersey Economic Development Authority (EDA) is entrusted with the responsibility for financing, designing and constructing all of the school facilities projects in the Abbott school districts, as well as in school districts which receive 55% or more in State funding for education and in school districts that are in Level II State monitoring. On July 29, 2002 Governor James E. McGreevey issued Executive Order No. 24 directing the EDA School Construction and Financing Program to be reconstituted as a subsidiary corporation called the New Jersey Schools Construction Corporation ("SCC"). Many of the potential school locations proposed by the school districts were environmentally challenged and considering the aggressive construction schedules mandated by the needs of the school districts, it became apparent that there was a need for the New Jersey Department of Environmental Protection ("NJDEP") to be actively involved with these projects.

In response to this need and pursuant to a Memorandum of Agreement between the NJDEP and the SCC, the Site Remediation Program's Bureau of Case Management formed the "Schools Construction Projects Team", which focuses solely on environmental remediation issues at potential school construction sites and providing specialized services to the SCC. In these instances, the primary purpose of the NJDEP's involvement in the projects is to verify work completed by the SCC's consultants and contractors for compliance with the Technical Requirements for Site Remediation (TRSR - N.J.A.C. 7:26E) and NJDEP's "Field Sampling Procedures Manual" to ensure administrative completeness of the documentation submitted for review. Consistent with their charge, the Schools Construction Projects Team requires and enforces an extremely high standard of environmental performance on the SCC and their contractors, frequently requiring more environmental due diligence than is required by the TRSR, to ensure the safety of the students. The prescribed environmental due diligence process associated with the Schools Construction Projects is illustrated in a flow diagram that is included on page vi.

The following Project Tracking report was compiled by the Schools Construction Projects Team because of the NJDEP's desire to keep the public informed on the status of these projects and in response to requests for information from concerned citizens and organizations alike. The report is a summary of SCC project cases that are being reviewed by the Schools Construction Projects Team, specifically concerning those Proposed Sites that have been identified by the SCC and are being reviewed for potential site environmental remediation issues. This report does not cover:

- All SCC projects;
- Project sites that are located in non-Abbott Districts;
- All potential issues concerning these projects (e.g., permitting, historic and cultural resources); or,
- School properties or potential school sites that are under the purview of other elements of the NJDEP or local health departments.

The initial portion of the Project Tracking Report includes a listing of the SCPT's Case Load, sorted by County. Subsequent portions of the report present the detailed status of the individual projects. This report is a summary document and will be routinely updated as new sites are proposed and reviewed.

The following acronyms may be used in the Project Tracking report. The associated definitions are provided herein to assist the reader with technical terms as defined in applicable environmental regulations and with terminology specific to the industry.

**Approved** = The associated document is compliant with applicable regulations and administratively complete.

**AOC** = Area of Concern per N.J.A.C. 7:26E-1.8

**AST** = Aboveground Storage Tank

**Background Contamination** = Concentrations of hazardous substances, hazardous waste and pollutants that originated from either natural sources (that is, non-man-made) or up-gradient, offsite discharges (that is, man-made, non-site-related discharges).

**BN** = Base Neutral Compounds

**BTEX** = Benzene Toluene, Ethylbenzene, Xylene

**BUST** - NJDEP Bureau of Underground Storage Tanks.

**Cap** = An engineering control that eliminates the potential for exposure to underlying contamination and/or eliminates potential contaminant migration.

**CERCLIS** = Comprehensive Environmental Response, Compensation, and Liability Information System (USEPA)

**CERC-NFRAP** = CERCLIS No Further Remedial Action Planned (USEPA)

**CHROME** = Chromate Chemical Production Waste Sites

**Coal Gas** = Former Manufactured Gas (Coal Gas) Sites

**Comments Issued** = The NJDEP has reviewed a draft version of the referenced document and either administrative or technical edits must be completed or questions must be addressed before it can be considered to be totally compliant with either the NJDEP's "Field Sampling Procedures Manual" or the TRSR and/or administratively complete.

**Conditional Approval** = The associated document is basically compliant with applicable regulations and administratively complete; however, conditions for final approval have been stipulated.

**CONSENT** = Superfund (CERCLA) Consent Decrees

**CORRACTS** = USEPA Corrective Action Report (USEPA)

**Deed Notice** = A document which provides notice of the following for a specific real property: 1. That the contamination on the real property exists at a level above the applicable unrestricted use soil remediation standards; 2. The restrictions to the applicable property due to contamination; and 3. The engineering controls applicable to the property.

**Delisted NPL** = National Priority List Deletions

**DOA** = Proposed Site no longer being considered

**DOD** = Department of Defense Sites

**ECC** = Early Childhood Center

**Engineering Controls** = Any physical mechanism to contain or stabilize contamination or ensure the effectiveness of a remedial action.

**EO215** = "Environmental Assessment/Impact Statement (EA/EIS) per Executive Order (EO) #215" - a report that is required for state agencies and independent authorities in conjunction with state initiated or state funded actions including new school construction, major additions and major site disturbances. An EO215 is not required for all projects. An EO215 builds upon the ESR and includes: a description of the proposed school project; a description of existing environmental conditions including man-made resources; an assessment of probable environmental impacts; a description of methods and commitments to address environmental impacts; a description of

environmental regulatory approvals needed; and, an alternatives analysis.

**ESR** = “Environmental Screening Report” – a fatal flaw analysis document that includes an inventory and assessment of site-related environmental conditions including: availability of sewer service; availability of potable water supply; identification of coastal and/or freshwater wetlands; identification of streams, flood hazard areas or other water bodies; identification of dedicated open space; identification of historic and/or archeological resources; identification of threatened or endangered plant or animal species; assessment of the potential for contamination of soil and/or groundwater; and investigation of prior or current environmental enforcement actions, site remediation activities and regional context. An ESR is not required for all projects.

**ERNS** = Emergency Response Notification System (USEPA)

**ES** = Elementary School

**Fill material** = Non-indigenous material, used to replace soil in an area or raise the topographic elevation of the site.

**FTTS INSP** = FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

**Historic Fill** = Non-indigenous material, deposited to raise the topographic elevation of the site, which was contaminated prior to emplacement, and is in no way connected with the operations at the location of emplacement and which may include, without limitation, construction debris, dredge spoils, incinerator residue, demolition debris, fly ash, or non-hazardous solid waste - per N.J.A.C. 7:26E-1.8 and TRSR Appendix D.

**HMIRS** = Hazardous Materials Information Reporting System

**HS** = High School

**INST CONTROL** = Sites With Closed Case(s) With Restrictions

**ISRA** = Industrial Site Recovery Act

**KCSL** = NJDEP's Known Contaminated Sites List

**LUST** = Leaking Underground Storage Tank

**MLTS** = Material Licensing Tracking System

**MS** = Middle School

**NA** = Not Applicable

**NFA** = "No Further Action" - a written determination by the NJDEP that based upon an evaluation of the historical use of the site, or of an area of concern or areas of concern at that site, as applicable, and any other investigation or action the NJDEP deems necessary, there are no discharged contaminants present at the site, at the area of concern or areas of concern, or at any other site to which a discharge originating at the site has migrated, or that any discharged contaminants present at the site or that have migrated from the site have been remediated in accordance with applicable remediation regulations.

**N.J.A.C. 7:26E** = NJDEP Technical Requirements for Site Remediation

**NJ MAJOR FACILITIES** = List of Major Facilities

**NJ PF** = Publicly Funded Cleanups Site Status Report

**NJPDES** = New Jersey Pollutant Discharge Elimination System Dischargers

**NPL** = USEPA National Priorities List (Superfund List)

**NPL Liens** = Federal Superfund Liens

**PA** = “Preliminary Assessment” - the first phase in the process to determine whether or not a site is contaminated. Identifies Areas of Concern (AOCs) present at the site. - Recommends applicable Site Investigation. - If no potentially contaminated areas of concern are identified, then

no further remediation is required at the site. -  
Scope and format specified in N.J.A.C. 7:26E-3.

**PADS** = PCB Activity Database System

**PAHs** = Polycyclic Aromatic Hydrocarbons (e.g.,  
Benzo(a)anthracene, Benzo(a)pyrene,  
Benzo(b)fluorene, Benzo(k)fluoranthene,  
Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene)

**PAR** = "Preliminary Assessment Report" –  
documents the PA via a scope and format  
specified in N.J.A.C. 7:26E-3.

**PCBs** = Polychlorinated Biphenyls

**Proposed NPL** = Proposed National Priority List  
Sites (USEPA)

**RA** = Remedial action - those actions taken at a  
contaminated site as may be required by the  
Department, including, without limitation,  
removal, treatment measures, containment,  
transportation, securing, or other engineering or  
institutional controls, whether to an unrestricted  
use or otherwise, designed to ensure that any  
discharged contaminant is remediated in  
compliance with the applicable remediation  
standards pursuant to N.J.A.C. 7:26E-6.

**RAATS** = RCRA Administrative Action Tracking  
System

**RASR** = Remedial Action Selection Report" - a  
report describing how a proposed remedial action  
was determined to be the most appropriate remedy  
pursuant to N.J.A.C. 7:26E-5.8.

**RAWP** = Remedial Action Work Plan the scope  
and format of which is specified in N.J.A.C. 7:26E-  
4.8, -5.2 and -6.2

**RCRA LQG** = Resource Conservation and  
Recovery Act - Large Quantity Generator

**RCRA SQG** = Resource Conservation and  
Recovery Act - Small Quantity Generator

**RCRA TSD** = Resource Conservation and  
Recovery Act - Treatment, Storage and Disposal  
Facility

**RCRIS** = Resource Conservation and Recovery  
Information System

**Revise/Resubmit** = The NJDEP has reviewed  
draft versions of the associated documents and  
critical revisions are required before the NJDEP  
will consider it to be technically compliant with  
the applicable regulations.

**RI** = Remedial Investigation - actions to  
investigate contamination and the problems  
presented by a discharge per N.J.A.C. 7:26E-4.  
Focuses on delineating of the extent of  
contamination and generating data for remedial  
action selection. Typically conducted in 2 to 3  
"phases", depending on complexity of situation.

**RIR** = Remedial Investigation Report per N.J.A.C.  
7:26E-4.8

**ROD** = Records Of Decision (USEPA)

**SHWS** = State Hazardous Waste Sites

**SI** = Site Investigation - the collection and  
evaluation of data adequate to determine whether  
or not discharged contaminants exist at a site or  
have migrated or are migrating from the site at  
levels in excess of the applicable remediation  
standards or if no further remediation is required.  
If such contaminants are present at the site, then  
additional delineation (see RI) / remediation is  
necessary. The minimum scope of the SI is based  
upon the information collected pursuant to the PA  
per N.J.A.C. 7:26E-3.

**SIR** = Site Investigation Report per N.J.A.C.  
7:26E-3.13

**Spills/Release Sites** = a list of sites where spills of  
hazardous materials to the ground were reported to  
the NJDEP Spill Hotline.

**SSTS** = Section 7 Tracking Systems

**SWF/LF** = Solid Waste Facilities/Landfill

**TPHC** = Total Petroleum Hydrocarbon  
Compounds (TPH is interchangeable with TPHC).

**TRIS** = Toxic Chemical Release Inventory  
System

**TRSR** = Technical Requirements for Site  
Remediation - N.J.A.C. 7:26E

**TSCA** = Toxic Substances Control Act

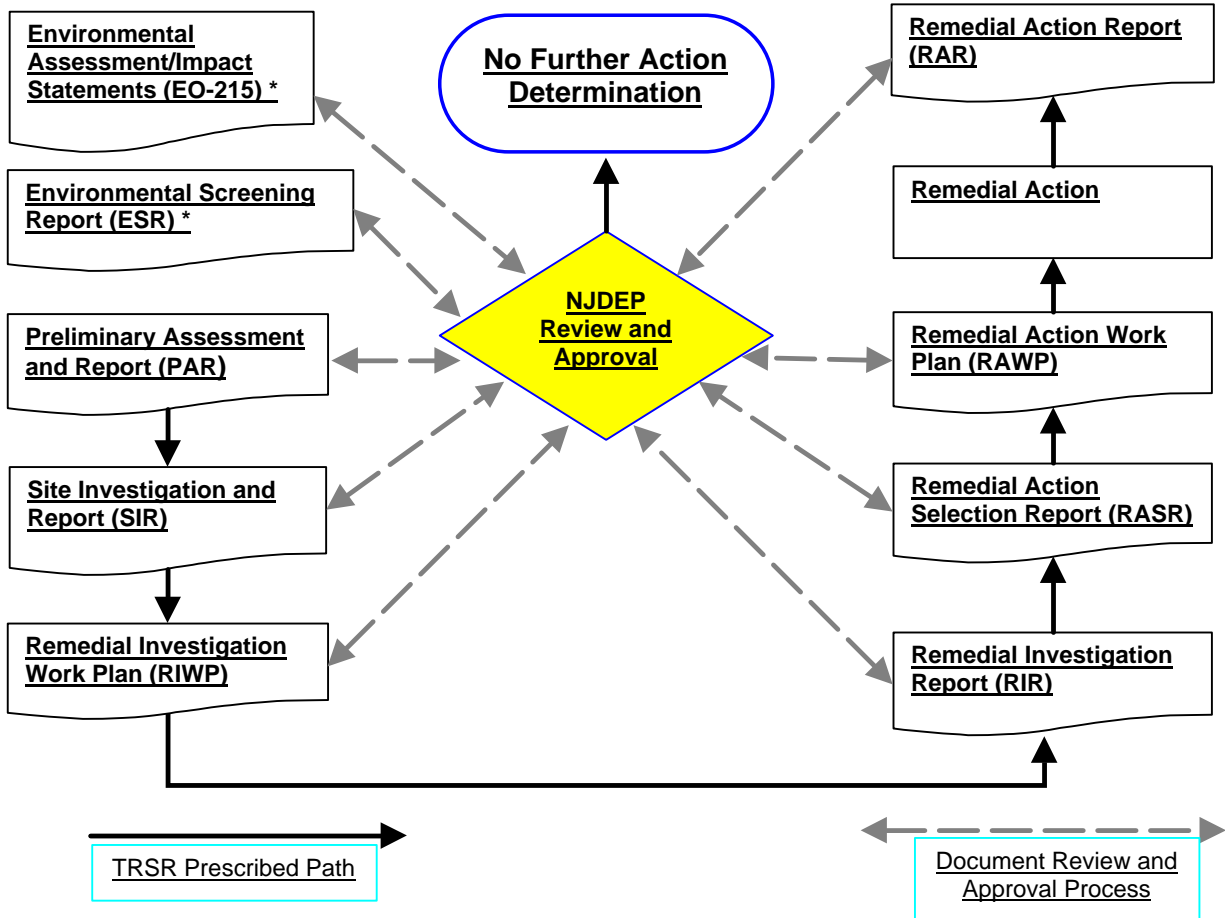

**US BROWNFIELDS** = A Listing of Brownfields  
Sites

**UST** = underground storage tank

**VOC** = Volatile Organic Compounds

**Wetland** = Any freshwater or coastal wetland

## SCHOOLS CONSTRUCTION PROGRAM ENVIRONMENTAL DUE DILIGENCE PROCESS FLOW CHART

\* Not Required by TRSR or for all Schools Projects and not a determining factor in the “No Further Action” determination process.

# NJDEP Schools Construction Project Team
